General information

Comfortable outdoor leisure clothes and stout footwear are suitable wear. A peaked cap or other kind of headgear is recommended for the heat radiation of the burner. You may take a camera with you. The wind does not blow in the passenger basket, because a hot-air balloon flies with the wind. The temperature is the same as on the ground. We will fly in a panorama height of about 300 – 500 metres.

The passenger must be at least seven years old.

Weather requirements

There must be light winds, below 5 m/s. The height of the clouds and the visibility must be sufficient. Rain or threat of rain will prevent the flight. In spring, summer and autumn we can fly only in the morning or in the evening due to rising air currents. The flights planned to take place on the coast may take place inland due to the wind conditions. The pilot will make the decision of the transfer of the flight considering the safety aspects.

Linnan Pallo Ltd. and aviation

Linnan Pallo Ltd. was founded in 1995. We fly yearly with over 1,000 satisfied customers. The hot-air balloon pilots have the education and qualifications required for operating as commercial pilots. In addition to our own quality system our operation is guided by the aviation law and the officials of the Ministry of Aviation.
